The Course

The four-day course is designed to make you both competent and confident in providing complete and partial denture treatment for your patients. It is a practical hands-on programme with the perfect blend of theory and practical aspects of denture construction from design, impressions, lab communication through to fit, maintenance and cleaning.

The course is designed with your patient in mind to achieve the optimal outcomes for function, fit and aesthetics.

All stages in denture construction will be discussed in detail including all equipment and materials required.

Day 1

Complete Dentures

- History & Clinical Examination
- Principles of denture construction
- Retention, Stability & Support
- Anatomical Landmarks
- Stages of treatment
- Impression techniques including border molding
- Lab communication

Overdentures
Milled Abutments
Denture Re-line

Hands-on:

Denture Reline
Treatment planning

Tutor:

Farhan is a Specialist Prosthodontist, graduating from The Eastman Dental Hospital in 2019.

He currently works in two private practices in Berkshire; where he takes referrals for complex wear cases, full mouth rehabs, dentures and implants. Prior to specialising, Farhan has worked as a general dentist for 11 years, spending time in hospital, general practice and the prison service.

He hopes this wealth of experience, coupled with his expert knowledge will be help aspire delegates transform their removable prosthodontic treatments.
